

CARTON BLANK, CARTON AND METHOD OF  
FORMING THE CARTON

5

TM.  
10 This application is a continuation-in-part of U.S.  
patent application serial number 09/607,197 filed June  
28, 2000, <sup>now U.S. PATENT 6,386,458</sup> for CARTON BLANK, CARTON AND METHOD OF FORMING  
THE CARTON of Walsh et al. and claims the benefit of U.S.  
provisional patent application serial number 60/244,716  
filed October 30, 2000, for CARTON BLANK, CARTON AND  
METHOD OF FORMING THE CARTON of Walsh et al., both of  
which are hereby incorporated by reference for all that  
is disclosed therein.

Field

The disclosure herein is directed generally to a  
carton blank and a carton formed therefrom.

Background

25 In order to protect moisture sensitive materials in  
a carton, there have been many kinds of fluid impervious  
cartons developed to protect such moisture sensitive  
materials from deleterious elements such as the humidity  
in the air. The vast majority of these leakproof cartons  
have an outer layer formed from a relatively rigid  
30 material and an inner layer formed from a relatively  
flexible fluid impervious material to provide the  
moisture protection. When it is desired to remove an  
amount of the material in the carton, it is necessary to  
open both the outer and inner layers. It is desirable  
35 that an opening be formed in both the outer and inner  
layers at the same time. Also, it is desirable that such  
an opening be located so that it is not necessary to make
